SUMMARY

- Full-stack software engineer with 5+ years of experience building scalable web applications. Specialized in React, Python, and cloud technologies. Passionate about creating user-centric solutions and mentoring junior developers.

WORK EXPERIENCE

- **Senior Software Engineer** at **TechCorp Inc.**, San Francisco, CA (Jan 2021 – Present)
    - Led development of microservices architecture serving 1M+ daily active users
    - Reduced API response time by 40% through optimization and caching strategies
    - Mentored team of 5 junior engineers, improving code quality and development speed
    - Implemented CI/CD pipeline reducing deployment time from 2 hours to 15 minutes
- **Software Engineer** at **StartupXYZ**, Palo Alto, CA (Jun 2019 – Dec 2020)
    - Built real-time chat application using WebSocket and React
    - Developed RESTful APIs in Python/Django serving 50K+ requests per hour
    - Collaborated with design team to implement pixel-perfect UI components
    - Participated in code reviews and improved team coding standards
- **Software Engineering Intern** at **BigTech Corp**, Mountain View, CA (Jun 2018 – Aug 2018)
    - Developed internal dashboard using React and D3.js for data visualization
    - Automated testing processes, increasing test coverage from 60% to 85%
    - Presented final project to 50+ engineers and product managers

EDUCATION

- **Stanford University**, Bachelor of Science in Computer Science (Sep 2015 – May 2019)
- GPA: 3.85/4.0
- **Lincoln High School**, High School Diploma (– Present)
- GPA: 4.0/4.0

PROJECTS

- **ResumeAI - AI-Powered Resume Builder** – Built full-stack application with React frontend and FastAPI backend. Integrated OpenAI GPT for resume optimization. Deployed on AWS with Docker/Kubernetes. 10K+ users in first month.
- **Task Manager Pro** – Developed collaborative task management tool with real-time updates using WebSocket. Implemented drag-and-drop interface and notification system. Used by 3 startups.
- **ML Price Predictor** – Created machine learning model to predict housing prices with 92% accuracy. Built web interface for predictions. Dataset of 50K+ properties.

SKILLS

Languages	Python, JavaScript, TypeScript, Go, SQL, HTML/CSS
Frameworks & Libraries	React, Node.js, FastAPI, Django, Flask, Next.js, TailwindCSS
Tools & Technologies	Git, Docker, Kubernetes, AWS, PostgreSQL, MongoDB, Redis
Methodologies	Agile/Scrum, CI/CD, Test-Driven Development, Microservices, RESTful APIs
